

## **Ashutosh Rishi Ranjan**

118 Bouverie Street, Carlton, VIC 3053, Australia  
+61 452 482 036  
ashutoshrishi92@gmail.com

### **Education**

**University of Melbourne**  
**M.Sc. Computer Science**

*Expected graduation in July 2016*

- Relevant courses: Declarative Programming, Programming Language Implementation, Distributed Systems & Distributed Algorithms, Cluster & Cloud Computing, Web Search & Text Analysis, Parallel & Multicore Computing.

**Symbiosis University, Pune, India**  
**B.Tech. Computer Science**

*Graduated 2014*

### **Coursework Projects**

**Masters Research Project on Compiler Construction,**  
**University of Melbourne**

*2015 to 2016*

- Worked on a compiler for a new multi-paradigm language, with a new Logic Programming based Intermediate Representation and LLVM.
- Compiler written completely in Haskell.
- Researched and implemented various techniques to create an incremental and work-saving compilation process.

**Compiler for a Toy Language in OCaml**  
**Programming Language Implementation, UniMelb**

*Semester 1, 2016*

- Implemented a complete compiler for a toy language in OCaml as part of a semester long project.
- Developed a basic *diff* based testing framework for the compiler code from scratch as extra work.

**Twitter Analysis REST Service over an Open Stack IAAS,**  
**Cluster and Cloud Computing, UniMelb**

*Semester 1, 2015*

- Wrote a Python client to harvest geo-located tweets around SF into a CouchDB instance. The client ran as a daemon parallelly from two different servers.
- Wrote a Python application to perform several different analyses on the stored data, making use of CouchDB Map-Reduce views and present it's result as a REST API.
- Setup a NGINX server on an instance to host the website presenting this data through graphs and heat maps.
- We built our own orchestration tool using Bash scripts and rsync, imitating Ansible.

### **Experience**

**Web Developer,**  
**Melbourne Web Co.**

*Contract basis, 2015*

- Worked independently and within a team environment on multiple web development projects using the Wordpress platform for local Australian businesses.
- Developed custom Wordpress plugins in PHP for a few jobs.

**Intern, Assistant to Project Manager,**  
**Bahwan Cybertek, Oman**

*June 2013*

- Modelled an implementation of an IBM Maximo Asset management solution for a client.

- Created a concept design for a responsive website for Bahwan Cybertek for the IT team.

**IT Intern,  
HELLA India**

*January to May, 2013*

- Developed a complete new in-house Inventory Management System on a PHP back-end for the team responsible of maintaining the local HELLA electronics stock.
- Configured and Deployed an Employee Training Portal using the Moodle framework.
- Recorded usage videos and documentation to help other teams in their adoption of the portal.

**Extra Curricular Activities**

**Co-Head, Student Technical Committee**

*2012*

*Symbiosis Institute of Technology, Pune, India*

- Developed the annual college festival website and registration back-end in PHP.
- Managed the team's finances and technical logistics, while collaborating with other teams.
- Created designs for the brochures and provided other design related guidance to other teams.

**Technical Skills**

**Languages:**

Current Projects: Haskell, OCaml, Javascript (ES6+5)

Worked With: Python, Java, C, PHP, C++

**Programming language implementation:** Compiler Design using LLVM

**Web Development and Design:**

- Programmed back-ends in Javascript, Python and PHP.
- Experience with designing and using REST APIs.
- JS Toolkit: ReactJS, Express, JQuery among others.
- Front-end development with responsive design and a focus on good UI/UX.

**Platforms:**

- Experienced with Unix/Linux; Configuring NGINX and Apache web servers on Linux.
- Worked on projects built upon Open Stack.

**Github**

<https://github.com/ashutoshkrishi>

**Hobbies**

Cycling, Muay Thai

**Referees**

Available Upon Request.
